

Supplementary figure 1

Schematic representation of the *TGR5* gene. Location of CpG sites, promoter regions (←) and MSP-amplified regions (M, -1958 to -1821; U, -1955 to -1820) are indicated. The transcription start site is indicated by a curved arrow. *TGR5*, G-protein-coupled Bile Acid Receptor Gpbar1; UTR, Untranslated region.
