

## Supplementary information

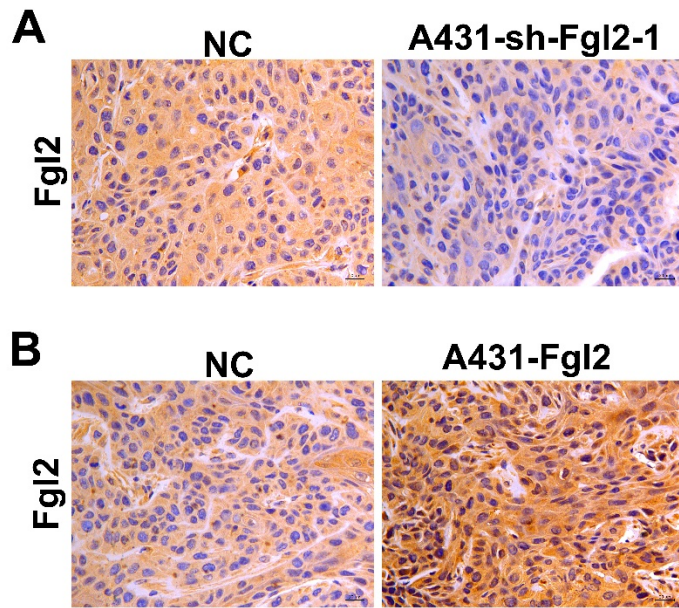

Figure S1. Fgl2 expression in subcutaneous xenograft tumours was verified by IHC. (A) Representative IHC staining of Fgl2 in subcutaneous xenografts of the Fgl2-silenced group or vehicle group. (B) Representative IHC staining of Fgl2 in subcutaneous xenografts of the Fgl2-overexpressing group or vehicle group.

## S2

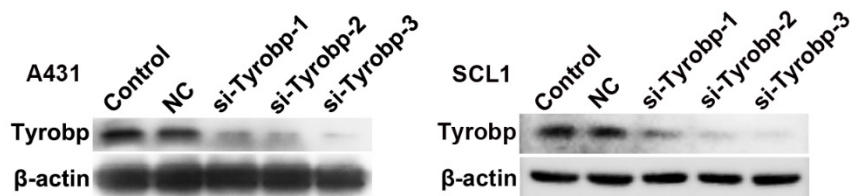

Figure S2. Western blot analysis determined Tyrobp levels in CSCC cells transfected with siRNA-Tyrobp.

## S3

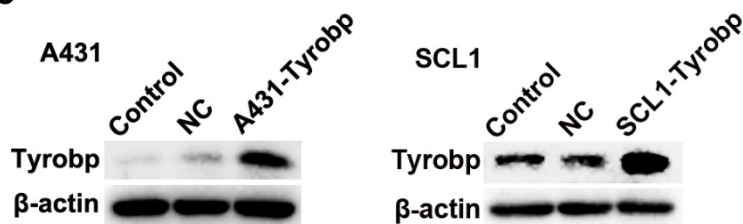

Figure S3. Western blot analysis determined Tyrobp levels in CSCC cells

overexpressing Tyrobp.

Supplementary table 1

**Details of the clinical CSCC samples used in this study.**

<b>Features</b>	<b>N</b>		
<b>Gender</b>	<b>Male</b>		<b>Female</b>
