
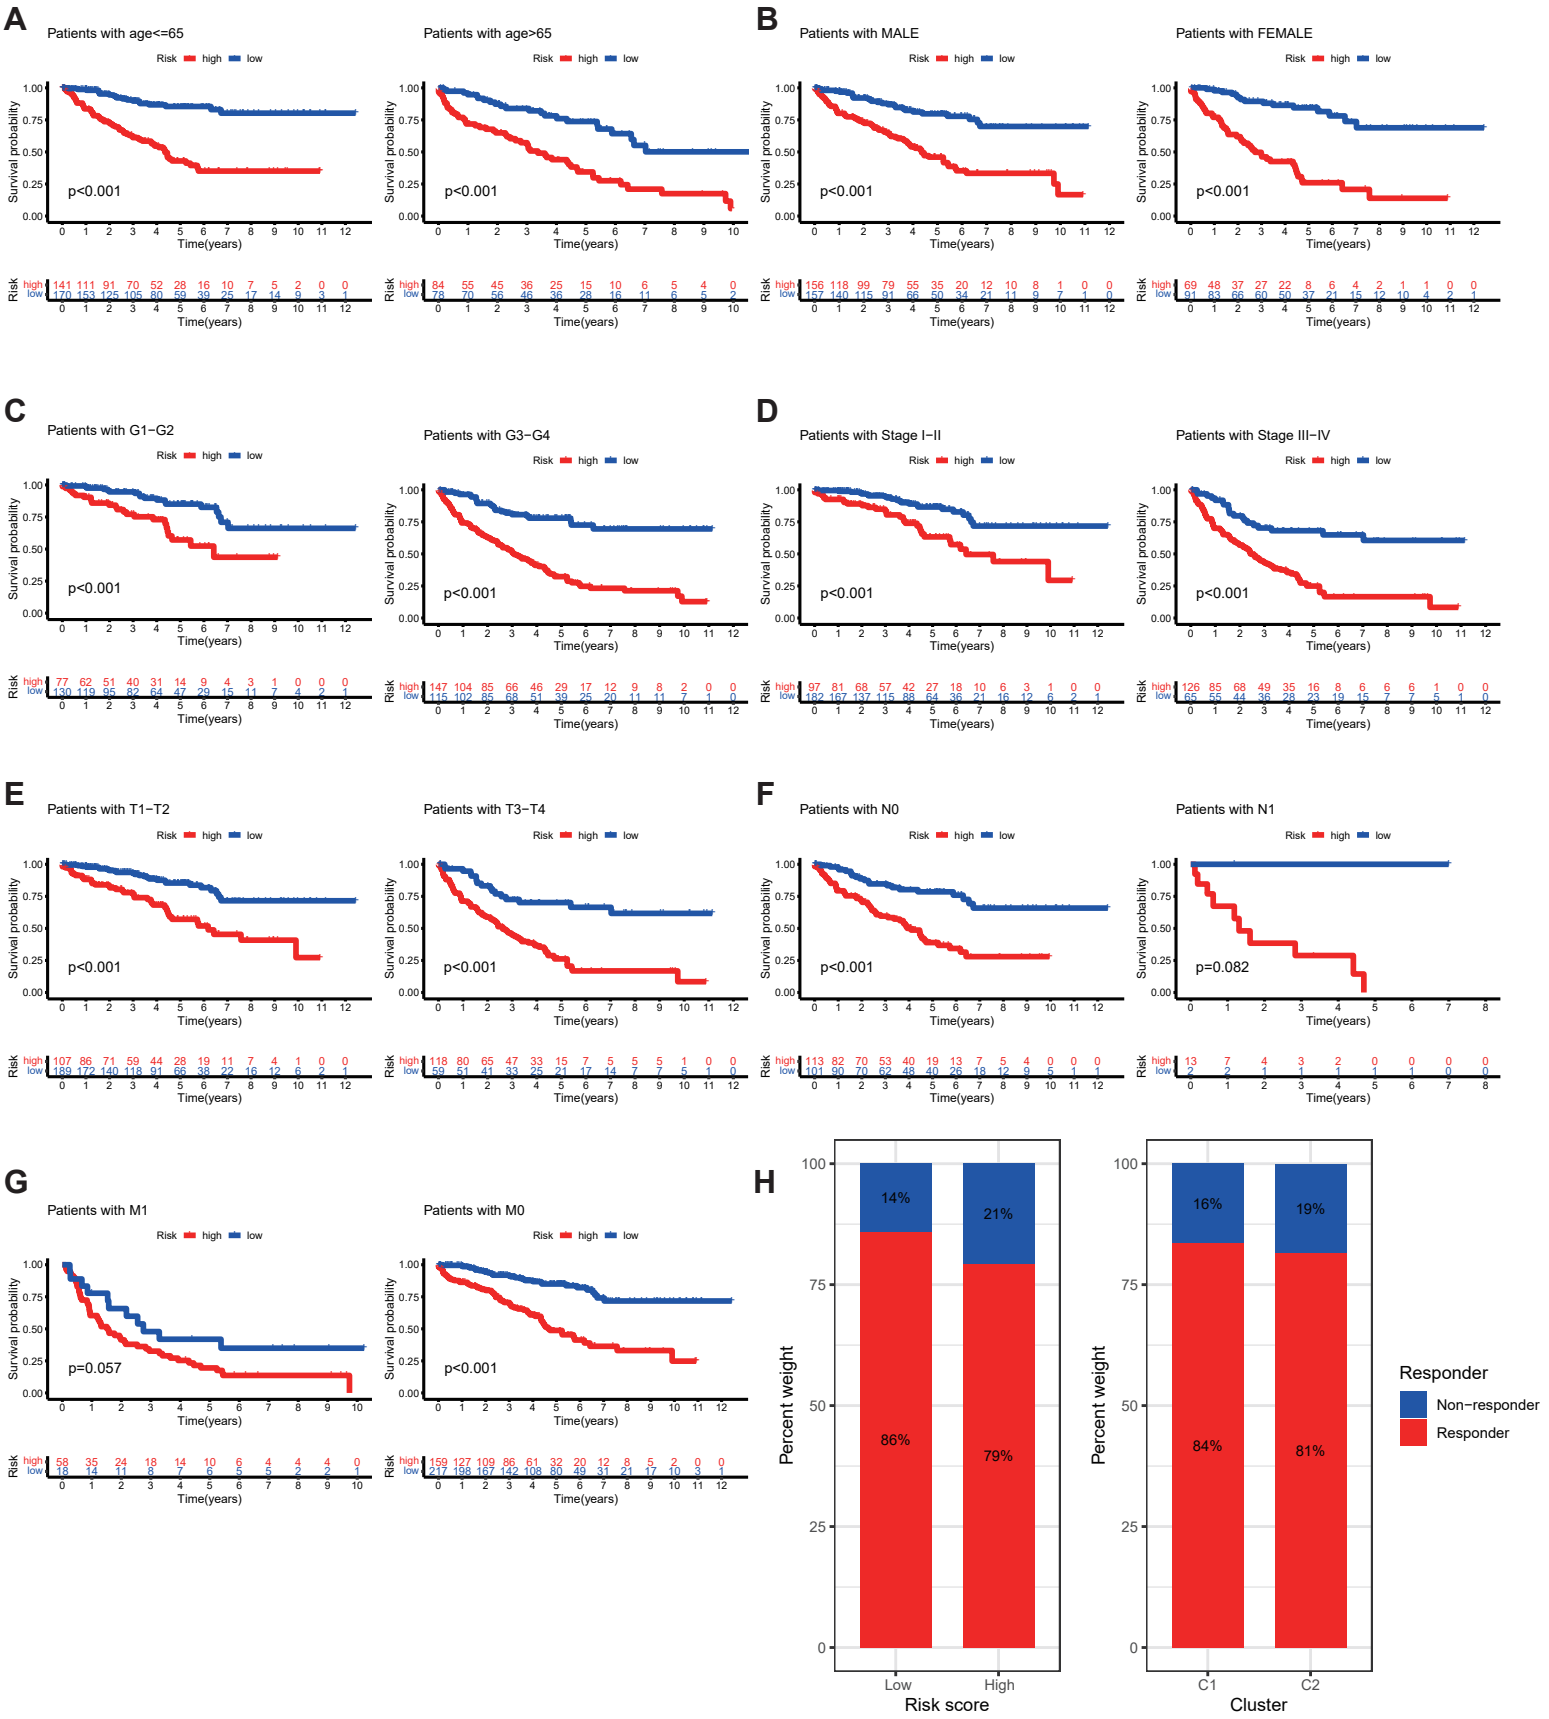

Figure S1. Kaplan-Meier survival analysis of samples with different clinical factors in different risk subgroups and the percentage of immunotherapy response in different subgroups. (A) Kaplan-Meier survival analysis of overall survival (OS) in different age subgroups. (B) Kaplan-Meier survival analysis of OS in different gender subgroups. (C) Kaplan-Meier survival analysis of OS in different graded subgroups. (D) Kaplan-Meier survival analysis of OS for different clinical stages. (E) Kaplan-Meier survival analysis of OS for different primary tumor size stages. (F) Kaplan-Meier survival analysis of OS with different lymph node infiltration grades. (G) Kaplan-Meier survival analysis of OS with different metastatic staging.(H) Differences in immunotherapy response across risk groups and subgroups.
